

# SMART APPLIANCES FOR SMART HOMES

— Orient Electric Home Appliances —

# LIFESTYLE APPLIANCES

Wouldn't it be taxing if your friend who promised to help you for the house party backs out at the last moment? But worry no more. Orient has appliances for your various needs, whether it's kitchen-related chores or ironing dresses or creating a comfy environment at home, Orient lifestyle appliances will help you get through with such tasks effortlessly. They are created on the basis of customer insights. Moreover, they are highly durable, safe and easy to operate.

## Dry Irons

No need to cover your silk sarees or any sensitive clothes with a thick cloth before ironing it. Without any worry, glide Orient's dry iron over them; they won't stick to it. It has passed 25Kms run test for its coating and non-stick operation.

## Juicer Mixer Grinder

Once you blend things in it, they become one and inseparable. Because its blades ensure zero residue, thus your smoothies will be smoother. For the lovers of fruit pulp, there is a special pulp collector that allows one to get the most out of fruits.

## Mixer Grinders

Get done with grinding spices or vegetables quickly with our mixer grinder's advanced high-power motor. Save time on pre-cooking chores, so that you can spend more time with your family.

Your hands are meant to work magic in the kitchen, not to hold the lid of a mixer grinder. Enjoy its handsfree operation.

## Breakfast Series

Orient's breakfast series is designed to turn good mornings into great. The elegant and practical appliances are made to ensure that you enjoy a hearty breakfast as well as the process of making it. The smart features like one-touch operation and customization settings add convenience to life and much-needed time to mornings.

## Oil Filled Radiators (OFR)

Chilly weather shouldn't create coldness in a family over the direction of a room heater. Orient's oil filled radiators are equipped with an additional fan and vents, thus spreading warmth all around.

# AIR COOLERS

Wouldn't it be great if after a hot, exhausting day at work, your spouse welcomes you to a chilled home? But then you realise that you are single. So what? Nothing should stop you from stepping into a pre-chilled home. Orient brings you a range of new-age IoT enabled air coolers that allow you the luxury of operating your Orient Air Cooler from anywhere.

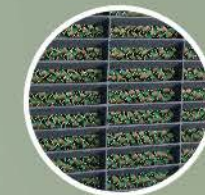

## WHY ORIENT AIR COOLERS?

With its Aerofan technology, cool air will reach every corner of your room.

Fully collapsible louvres don't let dust and insects get inside while the cooler is switched-off.

Its Densenest® honeycomb pads retain 45% more water, as a result, it gives 25% more cooling.

Anti-mosquito repellent prevents mosquito breeding inside the cooler. So, happy sleeping.

IoT-enabled cooler allows you to control its next-gen features - humidity control, eco-mode, pre-soaking - from anywhere.
